

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 1-46. (Canceled)

- Claim 47. (Presently Amended) A method for prognostic evaluation of a patient suspected of exhibiting an oncogenic disorder involving a receptor protein tyrosine kinase polypeptide/adaptor polypeptide complex comprising:
- (a) determining the concentration of a component of the receptor protein tyrosine kinase polypeptide/adaptor polypeptide complex present in a biological sample, taken from the patient, suspected of containing oncogenic tissue; ~~and~~
- (b) comparing the concentration level determined in step (a) to the concentration range of the component of the receptor protein tyrosine kinase polypeptide/adaptor polypeptide complex known to be present in normal, ~~non-~~ ~~oncogenic~~ tissue of the same type as present in the biological sample; and
- (c) correlating the result of step (b) to a prognosis.
- Claim 48. (Original) The method of claim 47, wherein the component of the receptor protein tyrosine kinase polypeptide/adaptor polypeptide complex is a protein tyrosine kinase polypeptide or an adaptor polypeptide.
- Claim 49. (Original) The method of claim 48, wherein the receptor protein tyrosine kinase polypeptide is a HER2 polypeptide.
- Claim 50. (Original) The method of claim 48, wherein the adaptor protein polypeptide is a GRB-7 polypeptide.
